Ioannis Telelis is a Senior Researcher (Grade A΄) at the Research Centre for Greek and Latin Literature of the Academy of Athens (KEELG).

He was born in Athens (1965) and holds a degree from the Department of History and Archaeology of the University of Ioannina (1987). In 1995, he defended his doctoral dissertation, titled: "Meteorological Phenomena and Climate in Byzantium: An Approach Based on Information from Sources and Empirical Evidence Regarding Climate Fluctuations in the Eastern Mediterranean and the Middle East (300–1500 AD)," which he completed during his postgraduate studies within the Section of Byzantine History at the University of Ioannina's Department of History and Archaeology. He also served as a research associate for an interdisciplinary project titled "Reconstruction of the Mediterranean Climate During Historical Times," conducted by the University of Ioannina's Section of Astrophysics and Meteorology in collaboration with the Section of Byzantine History (1988–1990). He has worked as a coordinator of material and as a scientific associate on the development of the educational CD-ROM " "ΣΟΦΙΑ": An electronic library dedicated to Byzantine history and art ", which was produced under the project "SAPPHO: Multimedia in Education and Culture" by the Lambrakis Research Foundation (1992–1994).

He has taught in the public secondary education system (1996–2003) as a philologist. From 1999 to 2000, he was seconded to the Department of Informatics at the University of Athens, where he participated in the collection and processing of historical material for the project: "KASTALIA: An Interactive Multimedia Learning Environment for the Investigative Study of History and Art Using Historical Sources" (Research and Development of Multimedia Educational Software for Secondary Education). Additionally, from 2003 to 2004, he contributed to the creation of an alternative textbook for teaching History, as part of the program "Education of Muslim Children 2002–2004" (EPEAEK II) implemented by the National and Kapodistrian University of Athens.

He was an *Erasmus* scholar at the University of Münster in Germany (1992) and a recipient of a scholarship from the State Scholarships Foundation (IKY) to conduct postdoctoral research on the topic: "Meteorological Theories of the Byzantines (11th–15th centuries AD)" (2000). He was awarded the 1996 Nikos Svoronos Prize for young historians -recognizing his outstanding performance as a researcher in Byzantine History- by the Institute for Mediterranean Studies of the Foundation for Research and Technology, Hellas (1998). Furthermore, he participated in the Greece - Germany Educational Exchange Program (Freie Universität Berlin, 2013).

At the Research Centre for Greek and Latin Literature (KEELG) of the Academy of Athens, he took part in the research project: "Critical Edition of the *Philosophy* by the Byzantine polymath George Pachymeres (13th century AD)," contributing

through the publication of critical editions of Books V and III of Pachymeres' *Philosophy*.

He contributed entries on Byzantine bibliography relating to Greece to the journal Byzantinische Zeitschrift (2008-2018). He has been a member of the Hellenic Committee for Byzantine Studies since 2005. He has also served on the Board of Directors of the Association of Research Staff of the Academy of Athens (SEPAA), as a Board member (2014-2015), Secretary (2014-2016), and Secretary (2016-2018). Since 2024, he has been an elected member of the Scientific Council of the Research Centres of the Academy of Athens (ESEKAA). In 2026, he has also been actively involved in the Open Data Working Group of the Research Centre for Greek and Latin Literature of the Academy of Athens.

His research interests focus on Byzantine Philology and History. More specifically, his research has addressed the following areas: 1. The reception of Aristotelian natural philosophy during the Palaiologan Renaissance, 2. The critical edition of Byzantine philosophical texts, particularly those concerned with science and the environment, 3. Environmental History and Byzantine Studies, with a focus on the interaction between humans and the natural environment during the Byzantine period, Byzantine perceptions of the natural environment, and climate history in Byzantium, 4.

He is the author of three monographs and has participated in numerous conferences in Greece and abroad. His research has been published in Greek and international journals, as well as in edited volumes.

His research interests focus on the fields of Byzantine philology and history. More specifically, his work has focused on: 1. The reception of Aristotelian natural philosophy during the Palaiologan Renaissance; 2. The critical editing of Byzantine philosophical texts (primarily those with a scientific or environmental focus); 3. Environmental history and Byzantine studies (the interaction between the natural environment and humans during the Byzantine period, the perception of the natural environment by the Byzantines, and the climate history of Byzantium).

He is the author of three monographs. He has participated in numerous conferences in Greece and abroad. His research has been published in both Greek and international journals, as well as in edited volumes.
